Crafting Log Homes Solar Style

Completely Revised Edition of *Logs, Wind and Sun*

A down-to-earth guide to building solar-powered log homes, complete with how-to illustrations and photos, plus enlightening stories from log home owners across the country. Follow the authors' journey of handcrafting an off-the-grid log home in the Colorado Rockies and discover how renewable energy is a perfect match for modern log home living, from small weekend cabins to expansive year-round homes.

REVIEWS for *Logs, Wind & Sun*

"I'm almost finished with the book now and had to email you to let you know that **this book may be close to the Bible as it gets...self-sufficiency, that is.**" — K. CRAWLEY

"**Logs, Wind and Sun made us realize what is really possible.** It opened up a whole new possibility of finding what we want in a piece of land. We thought that land with no power was out of the question. Our dream has got even better and is soon to become a reality!" — LEVACKS

"**Because this book is so much fun to read, you'll not notice how much you are learning** about foundations, log settling, chinking, solar and wind power and so much more. And the authors have liberally peppered the book with humorous stories about the adventures and experiences involved in building their home."

— TRACY JOHNSTON, LOG HOME STORE

"Many people dream of getting back to nature and living self-sufficiently in a house built with their own hands. **The Ewings show readers how to do just that** in this account of how they built a log house and then powered it using sun and wind."

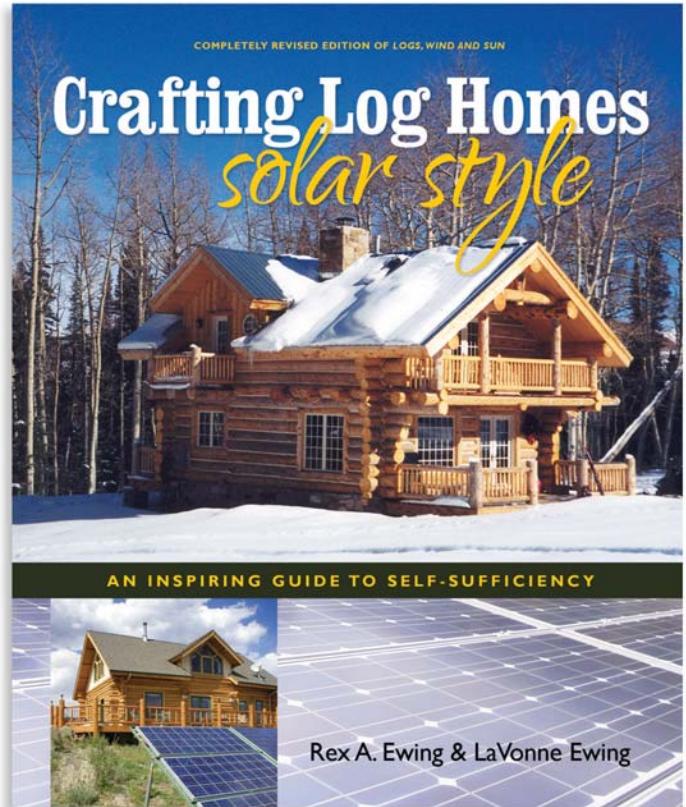

— LIBRARY JOURNAL, December 2002

"This is just the type of how-to book would-be owners/builders are seeking. You'll want to hear how others have done it! **Beautiful job and well-researched.**"

— WILLIAM LASKO, LASKO SCHOOL OF LOG BUILDING

"**I definitely recommend this book** for your log building library."

— GARY SCHROEDER, SCHROEDER LOG HOME SUPPLY INC.
